

Advanced Diagnostic Laboratories

MD Bridge – Electronic Lab Connectivity

Electronic Test Ordering and Resulting

As part of our continuing commitment to deliver high quality reference laboratory testing, Advanced Diagnostic Laboratories (ADx) is now offering MD Bridge; a premier web based electronic test order entry and results delivery system.

Convenient and Streamlined

Create your patient record, pick your tests, and print specimen labels, requisitions and manifests. Frequently ordered tests can be created in a short pick-list making ordering even easier. MD Bridge (MDB) will guide you through the data entry process to allow for error free orders every time.

Our test catalog, CPT codes, panel testing references, supplies, and additional laboratory information are all easily accessible.

Anytime, Anywhere

MD Bridge is web based, therefore you can retrieve results from any computer with a web browser. You can check the status of a result as well as view partial results anytime of day or night.

Secure

Your laboratory will designate which personnel will have access to information for each patient which can serve as a valuable tool to help comply with HIPAA policies.

MD Bridge Resolves Issues Related to:

- Manual requisitions
- Lost orders
- Delays in testing due to incomplete requisitions or test order questions
- Waiting for results to be faxed or mailed

Benefits

- Easy to use
- Results anytime, anywhere - an internet connection is all that is needed
- Eliminates requisition guesswork
- Positive specimen identification by using MDB generated specimen labels
- Reports auto-print as desired – Schedule report printing to fit your unique needs
- Patient demographics are stored, eliminating duplication of data entry
- Results immediately available after technician release

Contact ADx today to take advantage of enhanced test ordering and resulting to better serve your patients and laboratory clients
