Welcome to the National Jewish Health Family
Your gift has made an impact.

WHO WE ARE

National Jewish Health serves as a beacon of hope for millions of children and adults worldwide who suffer from respiratory, cardiac and immune-related diseases. People come to our main campus – and respiratory institutes in Denver, New York and Philadelphia – from around the world for our unsurpassed excellence in patient care and research and for our track record of success.

PERSONALIZED MEDICINE

Our physicians and researchers are at the forefront of a new era in health care: a personalized, preventive approach. We provide each patient a unique experience by bringing care and cutting-edge research together to treat some of the most devastating diseases. We focus on early detection, getting the right diagnosis the first time, and precision medicine for respiratory, cardiac and immune-related disorders.

Since **1899**,
the Leading Respiratory Hospital
in the Nation

Physicians Recognized on
Various Lists of Top Doctors

DISCOVER

Our scientific discoveries have contributed to important new treatments for allergies, pulmonary fibrosis, chronic obstructive pulmonary disease (COPD), COVID-19 and asthma, among others. This kind of great medicine travels. Whether you live in Denver, Los Angeles, New York or London, our research benefits you and your family – even if you never come here for care.

DIAGNOSIS

At National Jewish Health, we never say never to the toughest medical cases. We are known for our tenacity and expertise in finding answers where others have not. Our physicians and staff seek multiple perspectives on a patient's condition and are relentless in their efforts to understand the causes of a patient's symptoms.

PREVENTION

Prevention is an integral element of our continuum of care. We strive to maintain and improve quality of life by preventing disease, diagnosing it early, and through immunizations, screening tests, proper treatment and education.

TREATMENT

We help people who struggle to breathe get back to living the life they enjoy through treatment and research of conditions such as asthma, allergies, lung cancer, COPD, cystic fibrosis, COVID-19, heart and autoimmune diseases. We also provide occupational health, psychological health, rehabilitation, and sleep and wellness services, including smoking/vaping cessation and nutrition and education programs.

YOUR GIFT MATTERS

Many who have spent years looking for answers to their complex conditions, say **we are the only place that could help**. Your gifts help us find and provide those answers to all of our patients. For example:

- **Responding quickly to the COVID-19 pandemic** with specialized testing, care and research.
- **Helping children and adults** who face life-threatening diseases.
- Providing millions of dollars worth of **charity and subsidized care** annually.
- **Funding innovative research** by world-renowned physicians and scientists.
- **Funding training programs** for the next generation of physicians and researchers.
- Operating **Morgridge Academy K-8 school** for chronically ill children.
