

After-Hours Patient Care

For patients in need of immediate treatment for respiratory and allergy conditions, we offer after-hour triage care available 24 hours a day, seven days a week. At any time, new and existing patients can visit the triage unit on our main campus or call our after-hours line with urgent questions.

If possible, we ask patients to call 303.398.1759 before coming into the triage unit to determine the best course of action.
