

EMBRACING THE FUTURE

As the leading respiratory hospital in the nation, numbers don't scare us.
They motivate us to ask hard questions and discover solutions that improve health for those with respiratory, cardiac, immune and related diseases.

15,000,000 AMERICANS HAVE DANGEROUS FOOD ALLERGIES

Our clinical trials offer hope for a cure by desensitizing patients to allergenic foods.

40,000 AMERICANS DIE OF IDIOPATHIC PULMONARY FIBROSIS EVERY YEAR

New medications approved in 2014 provide the first treatment to slow disease progression.

VS.

263,000 ADOLESCENTS HAVE NEVER SMOKED TOBACCO BUT TRIED E-CIGARETTES

Our experts called for research and regulations to limit children's exposure to addictive nicotine products.

3x THE NUMBER OF VISITS BY AFRICAN AMERICANS WITH ASTHMA COMPARED TO CAUCASIANS

Clinical trial led by National Jewish Health seeks best asthma treatments for African Americans.
