

Patients of National Jewish Health are able to connect with third party applications (apps) to collect their health information. These apps are usually on personal devices, such as cell phones or computers, and can potentially consolidate records with other health systems. These apps will not have all of patient's health information, but they will include information such as vitals, labs, medications and immunizations.

## Approved Apps

MyLinks, Apple Health (coming soon)

**Don't see your favorite health app?** If you have an app that you would like us to connect to, please follow Step 1 below and send us a message with the app information and we will forward it to our vendor.

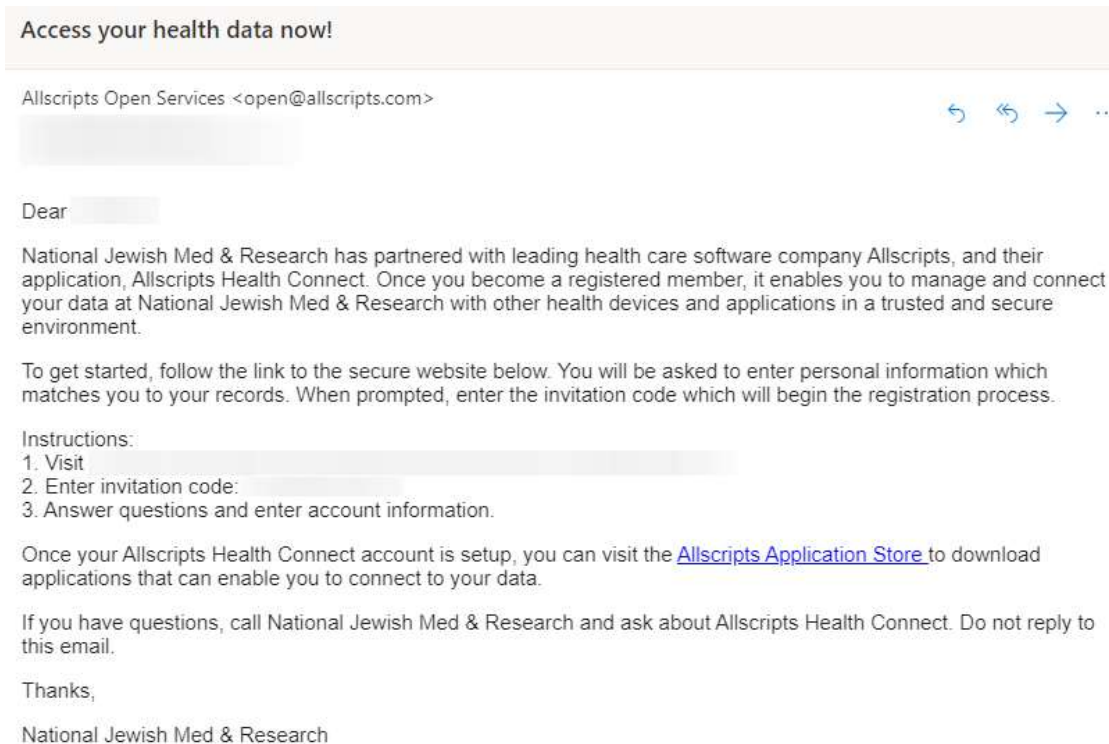

## Getting Ready

To begin, you must have an active National Jewish Health Patient Portal account. Log into your portal account and select Patient Access under the My Account section. Please allow two business days to complete your request.

## Accessing Your Record

When National Jewish Health has approved your portal access request, you will get an email from "Allscripts Open Services." (Allscripts is our electronic health record (EHR) and you will see their name and logo multiple times during this process.) The email will outline next steps.

1. Copy and paste the link in the email into an internet browser. You likely won't be able to click on it directly.

Access your health data now!

Allscripts Open Services <open@allscripts.com>

Dear [redacted]

National Jewish Med & Research has partnered with leading health care software company Allscripts, and their application, Allscripts Health Connect. Once you become a registered member, it enables you to manage and connect your data at National Jewish Med & Research with other health devices and applications in a trusted and secure environment.

To get started, follow the link to the secure website below. You will be asked to enter personal information which matches you to your records. When prompted, enter the invitation code which will begin the registration process.

Instructions:

1. Visit [redacted]
2. Enter invitation code: [redacted]
3. Answer questions and enter account information.

Once your Allscripts Health Connect account is setup, you can visit the [Allscripts Application Store](#) to download applications that can enable you to connect to your data.

If you have questions, call National Jewish Med & Research and ask about Allscripts Health Connect. Do not reply to this email.

Thanks,

National Jewish Med & Research

- You will be taken to a “Sign Up and Connect” webpage with the Allscripts logo on it. Click Next.

## Sign Up and Connect

These screens will take you through the steps for registering an account with Allscripts and connecting with your providers and health records at your physician or doctor's office.

This takes only a few minutes to complete.

- The Invite ID should automatically populate. If it doesn't, use the code in your email. You will also need to check the box that you are not a robot.

## Invitation Code

Enter the invitation code that was emailed or given to you by your doctor, hospital, or clinic.

- You will then be asked a series of questions to verify your identity. Use the name that National Jewish Health has on file, most likely your name as it appears on your insurance card, or your legal name. It will then ask you for your birthday and gender.

## Identity Verification

The following information is used to verify your identity. You may need to answer several questions.

What is your name?

First Name

Last Name

5. Then, you will create a username and password. It is important that you remember this username and password in case it is different than your National Jewish Health Patient Portal and third party app username and password. Password requirements are on the right side and will turn green as you meet the criteria.

## Setup your login

Already have an Allscripts Health Connect account?

About ▾

Login

Sign Up

1. Follow the process to create a MyLinks account. This is a separate login from your National Jewish Health Patient Portal and Allscripts Health Connect information, so make sure you remember it.
2. Once you are set up with MyLinks, you will search for National Jewish Health and “gather” records. It will take you to the Allscripts Health Connect login page again. Once you enter your username and password, it will take you back to MyLinks and your available records should be there.

---

### Please Note

- Not all of your records will be available on MyLinks. National Jewish Health staff has no control over what is displayed and how it looks. If you are missing a particular record, please check your National Jewish Health Patient Portal or contact Medical Records for a paper copy.
- MyLinks will not automatically update your records. You will need to “Gather” your records each time you think you should have new records. When you gather, you will need to login to the Allscripts Health Connect again to authorize the data transfer.
- There is no two-way communication between National Jewish Health and MyLinks. If you update any of your records in MyLinks, it will NOT cross over to your National Jewish Health patient portal OR the EHR that your provider documents in.
