# PRECISION MEDICINE: WHAT MAKES YOU DIFFERENT

We use precision medicine to look into each patient's genes, cells and biomolecules for the most intricate understanding of each person's disease. This knowledge helps our doctors make the correct diagnoses the first time, more effectively treat and prevent disease and help patients from around the world.

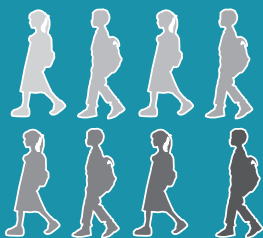

**10 - 15%**  
OF LUNG CANCER MUTATIONS  
ARE TREATABLE WITH  
TARGETED MEDICATIONS

Our researchers are finding current medicines that target gene mutations.

**26%**  
AMERICAN INDIAN  
SMOKING RATE

We tailored a new smoking cessation program to the specific needs of American Indians.

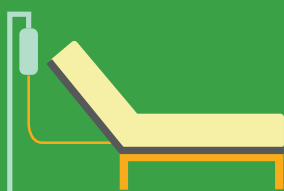

**6-8 MILLION**  
AMERICAN CHILDREN  
HAVE ASTHMA

Our researchers have linked prenatal exposure to diesel exhaust and predisposition to asthma.

**20 MILLION**  
AMERICANS ARE ESTIMATED  
TO HAVE COPD

Our researchers are helping create individualized COPD treatments.

**365 BEDS AT THE  
NATIONAL JEWISH HEALTH |  
SAINT JOSEPH HOSPITAL**

We are working with Saint Joseph Hospital to provide the full continuum of patient care, from our clinic to the hospital and back.
