## **Your Health Risks**

Western miners can be at risk for lung diseases due to workplace hazards. Exposure to dusts, fumes, smoke, radiation and chemicals place miners at risk for several lung conditions:

- Black Lung
- Chronic Bronchitis
- Chronic Obstructive Pulmonary Disease (COPD)
- Emphysema
- Lung Cancer
- Silicosis
- Tuberculosis

Uranium industry workers (miners, millers, ore transporters) and those who worked at or lived near nuclear test sites are at risk for:

- Certain Cancers
- Chronic Kidney Disease
- Lung Disease

## **Benefits of Screening**

Our confidential medical screening may lead to early diagnosis. Health issues diagnosed and treated early can make a big difference in quality of life and long-term health risks.

Our FREE screening services include:

- Chest X-ray with B Reading for Dust Disease
- Health Education
- Health Questionnaire
- Oximetry (oxygen level in the blood)
- Physical Exam
- Spirometry (breathing test)
- Benefits Counseling
- Recommendations for Further Medical Treatment or Evaluation
- Written Results Letter
