Are you looking for an additional treatment for your child's asthma?

Researchers are studying an experimental add-on medication for the treatment of asthma in young adults.

Qualifications include:

Young adults ages 12 to 17 with uncontrolled asthma despite use of inhaled corticosteroids

Study participation involves:

- Multiple visits to our research center for up to 2 ½ years
- Asthma tests, ECG and study visits at no charge
- Study medication or placebo at no charge
- Financial compensation provided to qualified study participants
