

Do you have uncontrolled asthma?

We are studying an investigational medication and its effect on moderate to severe asthma.

Qualifications include:

- Asthmatics 18+ years of age
- Have moderate to severe asthma for at least 12 months, not fully controlled
- Currently treated with medications for asthma like combined inhaled medications such as Advair, Symbicort, or Dulera

Study participation involves:

- 15 visits to our unit over approximately 11 months
- Asthma tests and study drug or placebo at no charge
- Financial compensation for qualified participants
