

- *Instructor*
- *Division of Mycobacterial & Respiratory Infections*
- *Department of Medicine*

Conditions Treated:

Research Areas:

- *Tuberculosis (TB)*
- *Nontuberculous Mycobacteria (NTM) Infections*

Programs & Services:

- *Department of Medicine*
- *Clinical Research*
- *Division of Mycobacterial and Respiratory Infections*

I am an Infectious Diseases physician with an interest in mycobacterial diseases. I am drawn to the challenge of diagnosing and caring for patients with infectious diseases, and tuberculosis (TB) and nontuberculous mycobacteria (NTM) disease are at the pinnacle of this challenge.

More research is needed to improve diagnostics and therapeutics for TB and, especially, NTM disease given its comparatively limited treatment and evidence-based management options. Thus, I have found my next mission in this frontier: to improve our understanding of NTM and care of patients with NTM diseases through clinical and epidemiological research.

Board Certification

2019: Internal Medicine
2021: Infectious Diseases

Education

2011 - Albert Einstein College of Medicine (Bronx/NY), Medical Doctor degree and Masters in
2016 Clinical Research Methods

Residency

2016 - 2019 University of California, Davis Health (Sacramento/CA), Internal Medicine Residency

Fellowship

2019 - University of California, Davis Health (Sacramento/CA), Infectious Diseases
2022 Fellowship

Awards & Recognition

2020: Department of Internal Medicine Trainee Research Award, University of California, Davis Health
