

Programs & Services:

- *Department of Medicine*
- *Division of Environmental & Occupational Health Sciences*

The majority of Dr. Li's current research is a) to define the specific CBD and sarcoidosis disease gene profiles and their function, b) to investigate the potential molecular and immunopathogenetic mechanisms suggested by these studies, and c) to identify possible surrogate biomarkers of CBD and sarcoidosis in the future. She strongly believe that by revealing the mechanisms of the granulomatous diseases, it will not only aid in the prevention or early diagnosis of CBD and sarcoidosis, but also provide insights into the potential therapeutic applications. It is also her goal to extend the results of the biomarker investigation by testing its application for use as a future clinical diagnostic.

Education

- 1991 - 1996 China Medical University, Shenyang, P.R.,
- 1996 - 1999 Tongji Medical University, Wuhan, P.R.,
- 2001 - 2004 Tongji Medical College, Huazhong University of Science & Technology, Wuhan, P.R.,
- 2002 - 2005 University of Ulm, Department of Internal Medicine, Ulm,

Fellowship

- 2006 - University of Colorado at Denver and Health Sciences Center, Department of
- 2007 Dermatology, Denver, Colorado,

Affiliations with the University of Colorado Denver

Division of Pulmonary and Critical Care Sciences, Department of Medicine, School of Medicine

Professional Memberships

2008-present: ATS

Awards & Recognition

2007: Society of Investigative Dermatology, Eugene M. Farber Travel Award for Young Investigators

Doctor's Contact Information

Office: 303.270.2524

Locations

National Jewish Health Main Campus

1400 Jackson St.
