IMPORTANT UPDATE: Myositis Expanded Antigen Panel

Dear Valued Client:

Effective Monday, July 31, 2023, the specificity for the antigen, cN-1A (cytosolic 5' nucleotidase 1A), has been added to the expanded antigen panel for Myositis (MYOS). The performance of this antigen has been rigorously monitored and the test has been fully validated by Advanced Diagnostic Laboratories following CAP/CLIA guidelines. IgG antibody responses to seventeen antigens will now be reported in the panel. Please see below for the full list of reported antigens following this update:

- Ku, Pm-Scl100, Pm-Scl75, Jo-1, SRP, PL-7, PL-12, EJ, OJ, Ro-52, Mi-2 beta, Mi-2 alpha, TIF-1 gamma, MDA5, NXP2, SAE1, cN-1A

If you have any questions, please contact our Client Services Team at 800.550.6227 or via email at clinreflabs@njhealth.org

Sincerely,

A handwritten signature in blue ink, appearing to read "Steve Groshong".
