

Home Sputum Collection Kits

**ADVANCED
DIAGNOSTIC
LABORATORIES**

Home sputum collection is an easy way to ensure your patients are able to collect good specimens at the right time and in the privacy of their homes. The Advanced Diagnostic Laboratories at National Jewish Health is now offering home sputum collection kits for TB and NTM samples, providing a convenient resource for patients with mobility issues or challenges accessing collection facilities.

About Home Sputum Collection

Home-collected sputum offers several advantages for providers, including:

- Faster result delivery
- Reduced patient time commitment
- Lower cost

Home Sputum Collection Process

Our Expertise

National Jewish Health Advanced Diagnostic Laboratories is recognized internationally as a leading diagnostic laboratory for mycobacteriology.

- CAP, CLIA and ISO 15189SM accredited
- Full speciation and subspeciation of TB and NTM
- Comprehensive menu of susceptibility testing, including drugs not commonly tested elsewhere

ORDER HOME SPUTUM COLLECTION KITS FOR YOUR PATIENTS

If you are interested in ordering kits, please contact Brooke Padilla at padillab@njhealth.org or 303.398.1420 to discuss setting up a client ID for your organization.
