

National Jewish to Host Interventional Pulmonology Conference

APRIL 01, 2008

DENVER — Pulmonologists, oncologists, thoracic surgeons and general practitioners can learn state-of-the-art services offered through National Jewish's Minimally Invasive Diagnostic Center at next month's Interventional Pulmonology conference. Physicians can learn about minimally invasive techniques and procedures that can benefit patients with lung cancer, tracheobronchial diseases, pleural processes and other thoracic disorders. The program is co-chaired by National Jewish pulmonologists Ali Musani, MD, FCCP, and Barry Make, MD. The conference is Saturday, May 10, on the National Jewish campus in Denver.

"This half-day long conference will introduce those in attendance to the extensive list of minimally invasive procedures that we can now perform through our new diagnostic center," said Dr. Musani. "We are now the only center in the Rocky Mountain Region that offers these state-of-the-art services and technologies. It is important that physicians and patients are aware that these services are now offered close to home."

Presentations will cover; diagnosis and staging of cancer, endobronchial brachytherapy, non pharmacologic interventions in emphysema, and tracheobronchial stenting. There will also be sessions on clinical research in interventional pulmonology and a panel discussion. Attendees can also earn CME credit. National Jewish is accredited by the ACCME to provide CME credit hours for physicians.

National Jewish Medical and Research Center is the only medical and research center in the United States devoted entirely to respiratory, allergic, and immune system diseases, including asthma, tuberculosis, emphysema, severe allergies and autoimmune diseases, such as lupus. It has been rated the #1 respiratory hospital in the nation for ten straight years by *U.S. News & World Report*.

For more information or to register for the conference go to our Office of Professional Education or contact Andrea Harshmann at 303-398-1948 or at harshmanna@njhealth.org.

National Jewish Health is the leading respiratory hospital in the nation. Founded 123 years ago as a nonprofit hospital, National Jewish Health today is the only facility in the world dedicated exclusively to groundbreaking medical research and treatment of patients with respiratory, cardiac, immune and related disorders. Patients and families come to National Jewish Health from around the world to receive cutting-edge, comprehensive, coordinated care. To learn more, visit the [media resources page](#).
